

Premium direct drive built for power

Synergy RDD Series

The RDD side-mounted garage door opener with a space-saving design, frees up garage space in the ceiling. The RDD series drives are perfect for spring-balanced* custom, architectural, and heavy wind loaded doors.

Considered a powerhouse of residential garage door openers with its patented motor gear assembly the RDD series provides more torque to installations on extra heavy doors.

*Regular checkups and maintenance of the door and springs are required to ensure proper performance of the RDD drive.

** Available after May 2024

Size and capability

Our RDD Product line is engineered to meet the highest standards of performance, reliability, and safety. Designed in Germany, certified for operation and regulatory compliance in the United States by UL and the FCC. The RDD series has one of the smallest physical profiles and the most powerful torque of any operator on the market in its class with extreme ease of installation. Assembled in the USA.

maveo WiFi

Control your door from the maveo WiFi smartphone app. The maveo Connect Panel provides ability to open/close the door, turn lights on and off, set the timer-to-close function, setup coming feature by activating the geofencing function, and provide guest access. The maveo Connect Panel is also compatible with all ceiling mount style Synergy door openers. (manufactured after 2016)

Battery backup system

Marantec's Battery Backup System 700 is compatible with all Synergy RDD operators and allows illuminated garage door operation during power outages when using the wall control panel. All Marantec openers have battery backup availability. When installed in California, SB-969 and Health and Safety Codes 19890 and 19892 requires battery backup during installation.

— Power & efficiency, redefined

Strong, quiet and powerful, the Synergy series is built with long-lasting DC motors

- Soft-start/soft-stop technology designed to reduce wear and tear on your garage door and operator.
- All Synergy garage door openers are Homelink™ compatible and allow for remote door control from your vehicle. Our garage door openers use a secure multi-bit code technology that allows you to program an unlimited amount of Synergy remote controls.
